

# Tank Truck CAP-12,5

Special vehicle for transporting, filling and delivering of diesel fuel and petrol for ensuring operation of the ground vehicles.

#### Meets:

- applicable EU requirements for international road transport of hazardous material (ADR, class 3)
- environment legislation requirements on utilisation of vehicles on public roads (EURO II)

## Tank Truck CAP-12,5

Tank truck CAP – 12,5 has been designed for transporting, filling and delivering of diesel fuel and petrol for ensuring operation of the ground vehicles.

CAP – 12,5 meets EU requirements for international road transport of hazardous material (ADR, class 3), environment legislation requirements on utilisation of vehicles on public roads (EURO II) and users' specific military operation requirements.

### Basic tasks:

- Filling its own tank from an outside source (non-gauged and unfiltered)
- Filling its own tank through its own pump by filtered and gauged fuel
- Emptying its own tank through its own pump by filtered and gauged fuel
- Filling ground vehicles by filtered and gauged fuel
- Filling ground vehicles by filtered and gauged fuel from the outside sources without running the fuel through its own tank
- Pumping filtered and gauged fuel between two outsider sources without running the fuel through its own tank
- Emptying its own tank by self-discharging
- Filling the tank through the top neck

### Basic data:

- Dimensions (l x w x h).....9100 x 2550 x 3440 mm
- Undercarriage T 815-6MOR87 33 224 8x8.1R
- Two-chamber tank made of stainless steel, capacity.....12 500 litres
- Pump maximum delivery.....600 l/min
- Maximum float rate through one delivery place.....300 l/min
- Number of delivery places.....2
- Delivery volumetric counter
- Vehicle engine output.....324 kW at 1800 r.p.m.
- Vehicle maximum velocity.....100 km / h
- Gearbox.....automatic, 6 speed
- Brakes.....drums with ABS
- Suspension - flat springs and telescopic shock absorbers in the front  
- air bellows + springs + telescopic shock absorbers in the rear and torsion stabiliser on the first rear axle
