

KERBEROS MOBILE WIRELESS

PORTABLE SYSTEM FOR SCANNING VEHICLE UNDERCARRIAGES

DESCRIPTION OF THE SYSTEM

The Kerberos Mobile Wireless system is specially developed for fast and reliable inspection of the surface of vehicle undercarriages. The system can be put into operation within 2 minutes from arrival at the post and allows operators to reveal all changes performed to a vehicle's undercarriage, including comparison with a reference image saved to the database. The equipment includes a system for automatically scanning vehicle licence plates.

APPLICATION

- power plants
- airports
- chemical plants
- military camps
- security services
- government and military facilities
- state borders
- temporary military or civil bases

SYSTEM PROPERTIES

- activation of the system within 2 minutes
