HISTORY

VOP CZ, s.p. has a long tradition in the field of engineering production and special equipment. The company's history dates back to 1946, when the original armoury, employing 18 people, gradually built workshops to repair captured military equipment. From 1952 the company focused on repairing tanks and propulsion units. Initially, these were T-34 tanks, followed by the T-54, T-55 and, from 1983, the latest T-72 model. The company has also played a major role in the modernisation of this military equipment.

Throughout its history the company has repaired or modernised 4 600 tanks and over 20 000 pieces of military equipment. Since 2009 it has produced 107 PANDUR II 8x8 CZ wheeled armoured vehicles, including development of its own reconnaissance, ambulance, engineer and command versions.

In the 1990s the firm modernised its technological facilities and greatly expanded production and repairs for the civil sector (production and cooperation in engineering production abroad). Engineering production continues to be the company's main programme today. Military government and research institutes were merged between 2001 and 2010.

PRESENT DAY

In 2012 the entire concern was renamed VOP CZ. The enterprise now offers engineering production, special equipment and activities in development of own products for civil and special purposes.

OUR VISION

Thanks to the company's long-term development and investment in technology, human resources and production capacities, VOP CZ, is now the largest military concern in the Czech Republic.

In the field of civil engineering production it is a recognised partner for construction machinery, handling equipment and parts of investment units.

- └ THE COMPANY'S VALUES
- └ KEY RESPONSIBILITIES AND MISSION
- └ LONG-TERM OBJECTIVES

THE COMPANY'S VALUES

- └ Management based on team work and cooperation
- └ Quality and efficiency are our key criteria
- └ Building and maintaining mutual respect and trust

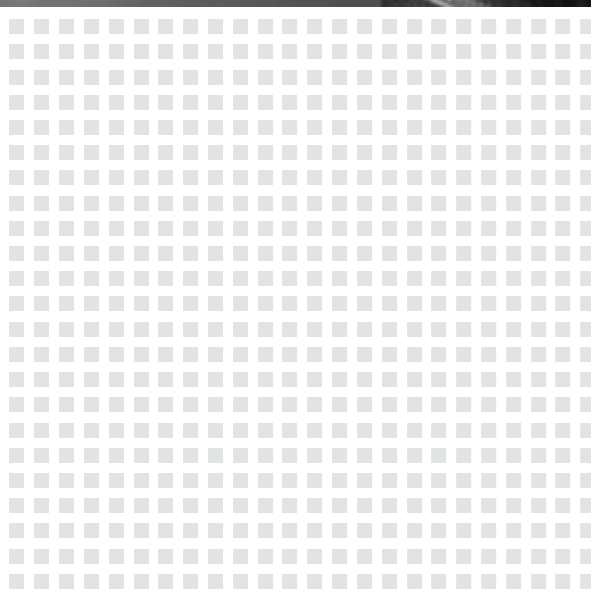

KEY RESPONSIBILITIES AND MISSION

- └ To meet the needs and expectations of all our customers with high quality products, flexibility and professional communication.
- └ To support the company's development, always to our customers' maximum benefit.
- └ To participate in development of the region in which the company operates.
- └ To develop our production programme in areas of engineering, special equipment and corporate growth.
- └ To support and maintain the principles of environmental protection.

LONG-TERM OBJECTIVES

- └ To constantly boost the company's financial stability and development,
- └ To be a stable, modern and respected partner on the Czech as well as international markets,
- └ To apply the latest knowledge in the field of research & development and up-to-date manufacturing processes,
- └ To develop and maintain long-term and superior relations with our customers and suppliers,
- └ To support the competence of our personnel and their professional and personal development.

PRODUCTION PROGRAM AND PILLARS IN THE DEVELOPMENT OF

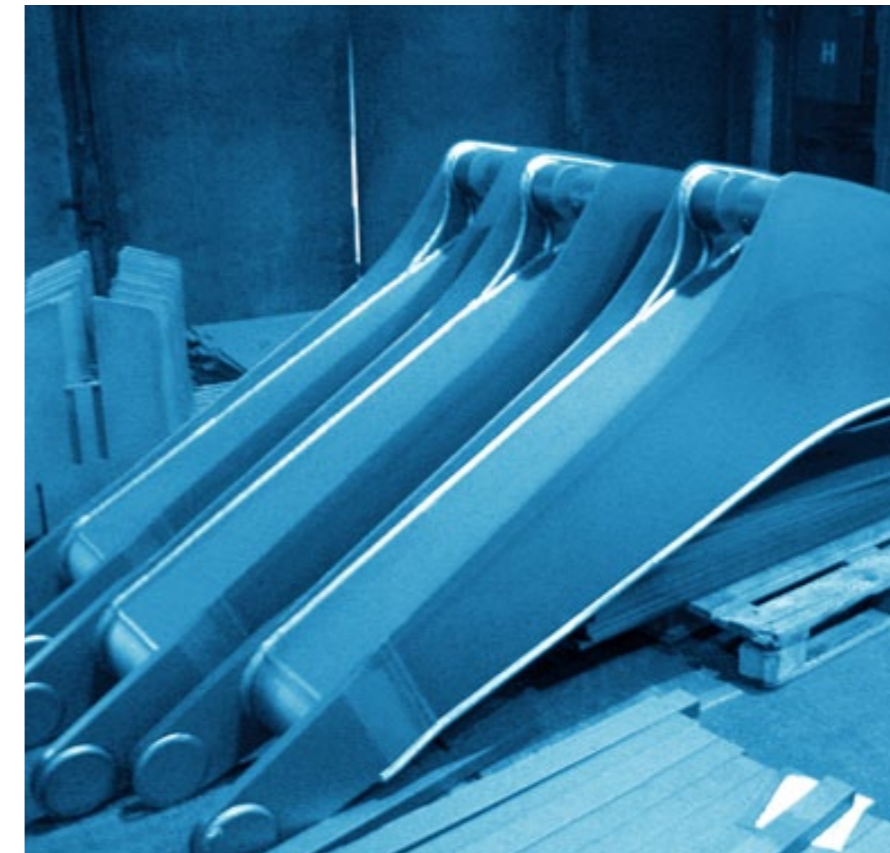

└ ENGINEERING PRODUCTION

└ SPECIAL EQUIPMENT

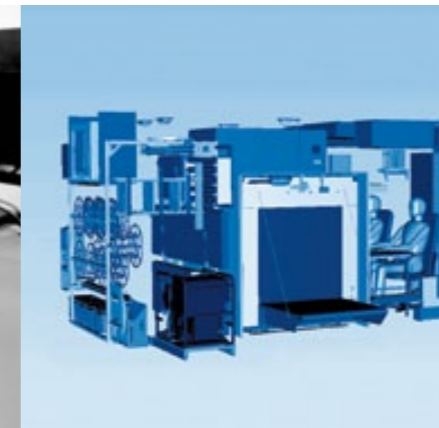

└ DEVELOPMENT

ENGINEERING PRODUCTION

- └ Massive weldments
- └ Chassis for construction machinery
- └ Excavator buckets and arms
- └ Hydraulic, fuel and oil tanks
- └ Assembly of final products
- └ Custom production of investment units
- └ Small-series and large-series production
- └ DAPPER – articulated loader, our own design

- └ SPECIAL EQUIPMENT
- └ DEVELOPMENT

DEVELOPMENT

In our development activities we focus on developing specialised equipment for the military and security industry. We also use this know-how in products for the civil sector. Examples of this are our own welding positioners or the Dapper multipurpose loader.

VOP CZ has its own modern in-house development centre.

EXAMPLES OF OUR DEVELOPMENT PROJECTS

- └ **NBC protection gear** - ACHR-90M & MDA decontamination vehicles, EDS mixer, CBRN evaluation vehicle, LINKA-08 decontamination line, NBC units, SDO personnel decontamination system, etc.
- └ **Protection and monitoring equipment** - MKPV Mobile Entrance Checkpoint, 3D scanner, KPCO Command Control Center, watchtowers, motion sensors and emergency vehicles
- └ **Pandur vehicle variants** - reconnaissance (with and without radar), ambulance, engineer, command
- └ **PKM field morgue container**
- └ **Programmable welding positioners**
- └ **Tanker vehicles** - for fuel, drinking water
- └ **MDA small decontamination vehicle** and more ...

SPECIAL EQUIPMENT

- └ Tracked vehicles
- └ Wheeled vehicles
- └ Engineer equipment
- └ NBC protection gear
- └ Modular surveillance systems
- └ Field hospitals and medical equipment
- └ Specialist training
- └ Restoration of historical military equipment
- └ Other special equipment

INTEGRATED BUSINESS MANAGEMENT SYSTEM

Motto:

"Being the business of choice is not a fact, it is an option."

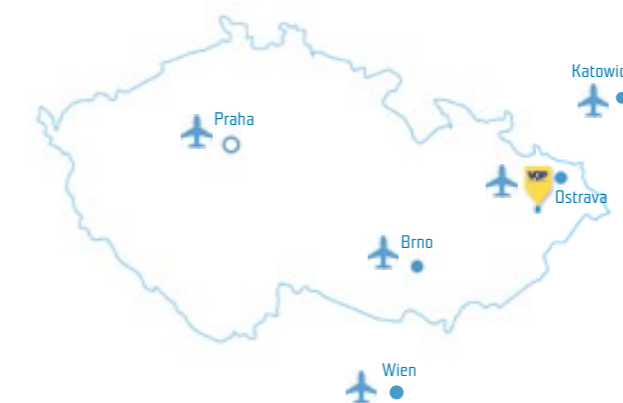

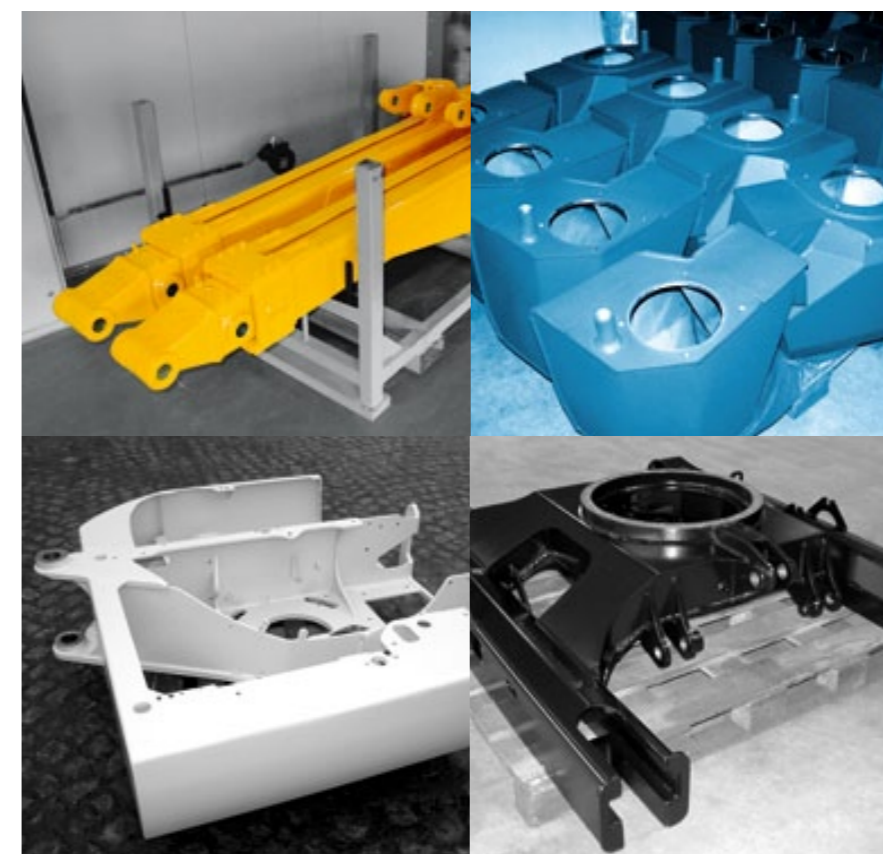

Our integrated business management system presents the systematic approach taken by VOP CZ towards management in general and also towards management of individual processes. One of our priorities is to maintain an economic, ecological and social balance, a balance which is the key to sustainable development.

MAIN BUSINESS PROCESSES

- 7 BUSINESS MANAGEMENT
- 7 SALES AND MARKETING
- 7 PROJECT MANAGEMENT
- 7 PRODUCTION AND PRODUCTION TECHNOLOGY
- 7 DEVELOPMENT WORK
- 7 QUALITY CONTROL

FACTS AND FIGURES

- 7 Number of employees: 700
- 7 Annual turnover: 2 billion CZK
- 7 Investment: 10 % of turnover
